THE WORLD OF EXCELLENCE

We realize practical solutions

For the economical success of a rental operation and the service work shop, a professional planning of the total situation is of great importance. Based on our many years of experience, we can plan the best solution for you.

Our service is:

- › Positioning the storage systems based on the quantities which are requested
- › We do realize individual solutions following your shop concept
- › Producing proposals for the shop design
- › Establishing of plans (On request a display in 3-D)

THE MONTANA STORAGE SYSTEM

Efficient and innovative

For many years, professionals world-wide have had confidence in abs from MONTANA when the storage of skis and boards is concerned.

PERFECT PRESENTATION, PERFECT HANDLING

On the MONTANA storage system, your skis and snowboards will be shown at their best. The handling is constructed according to the latest ergonomic knowledge and allows a quick turn around of your products coming in and going out.

TOP QUALITY IN EVERY ASPECT

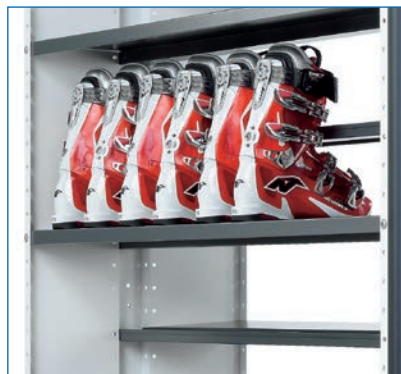

Made in Switzerland

For abs plus, only high quality materials with the latest technology are used. All racks are made of high quality, «sendzimir» galvanized and coil coated steel sheet. The goal is best stability with minimum weight. On request, the new storage system can be completely mounted in your facility by our technicians.

As always, MONTANA will be of assistance to you even after the purchase. Our complete service organization is available during the season on weekends.

Light and stable

Thanks to the honeycomb technique, all MONTANA abs racks have a high stability.

Individual construction possibilities

MONTANA abs can be according to any existing shop concept, either in a basic version or in an individually designed presentation version.

Thanks to the modular construction, there are no limits in how to present the new racks.

Powder coated without panel

Powder coated with panel SMALL

Powder coated with panel individual

Powder coated with panel SUPERIOR

Powder coated with panel TOP

Individual combinations

MONTANA abs racks are available in various lengths:

- › 100 cm
- › 150 cm
- › 200 cm
- › 240 cm
- › 300 cm
- › Special dimension upon request

All racks with the same tracking system can be combined to a total length of 600 cm.

Freestanding racks can be combined in unlimited quantities.

BOOT RACK / HELMET RACK

THE VERSATILE BOOT AND HELMET RACK

The Width of the shelves can be adjusted and they can be reversed, so providing the most efficient space for storing ski shoes, cross country ski shoes, snowboarding shoes, helmets, snowboard bindings, and much more.

MIX RACK (BOOT/HELMET)
powder-coated, with tray and

SPEED DRYER

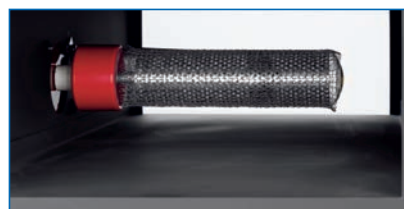

FAN-POWERED AUTOMATIC-DRYER FOR SKI, SNOWBOARD AND CROSS-COUNTRY BOOTS

The high air-flow reduces the time of drying to an absolute minimum. The heat and ventilation aggregates are programmable and you can use either the standard warm air or room temperature air. Thanks to the option of having an automatic air stop for each drying position, you can save energy and use the warm air exactly where you need it.

Option stop valve

Each drying unit is equipped with a stop valve. This means that only when in use the drying units will be provided with hot air.

Efficient ionisation

Directly in the air supply integrated ionisation module prevents very effectively the building of bad odors.

Optional

Drip tray for depot area (pluggable)

BOOT DRYER WALL

BOOT DRYER WITH VENTILATION OR ELECTRICAL HEATING SYSTEM

Our boot dryers for the professional use are functional and, except the ionisation, absolutely maintenance free. The shape of the drying arms prevents tilting of the boots and enables an efficient drying all the way to the tip of the boot.

The heating elements and ventilations are equipped with a temperature protection. Our boot dryers are available in various sizes (2 – 20 pairs) and also can include a water connection. Please ask for detailed information.

Efficient ionisation
Directly in the air supply integrated ionisation module prevents very effectively the building of bad odors. (option for fan-powered dryers)

Lockable timer (programmable weekly) and **Air control with turning valves** (fan-powered dryer)

Speed Dry wall-mounted
powered dryer (385 m³/h). Also available with stand.

Eco Dry wall-mounted
electric dryer. Also available with stand.

NEUTRALIZER/NEUTRALIZER PRO

DISINFECTION SYSTEM FOR ALL TYPES OF BOOTS AND HELMETS

Disinfection system for all types of boots and helmets. With this easy to use unit you can easily disinfect your rental boots and helmets in an efficient way. Made of stainless steel.

Optimal spraying method

An even distribution of the disinfectant within the boots and helmets is guaranteed by 6 nozzles. Optionally you can purchase a table that allows you to work in perfect working height and gives you additional storage space.

Neutralizer Pro

The new Neutralizer Pro requires a external air supply. For permanent operation suitable.

ELECTRIC INSTALLATIONS

IONISATION APPARATUS

THE EFFICIENT SOLUTION FOR AIR CLEANING AND REMOVAL OF BAD ODOR

Air processing

MONTANA ionisation units are producing a healthy fresh air climate which is motivating people. The concentration and production ability will be increased.

High performance

One MONTANA ionisation unit (mod. 7-D-1i) can purify a room up to a size of around 290 m³ per hour. For bigger rooms several units can be used.

Odor neutralisation

An efficient ionisation neutralizes unpleasant smells thanks to an effective micro oxidation.

Air germinating

The MONTANA ionisation unit destroys all air germs, mushrooms and bacteria.

ELECTRIC INSTALLATIONS

Voltage	230 Volt / 50 Hz
Rated power	35 watt / 290 m ³ /h

DIMENSIONS

BUTLER

Butler 1 – Transport rack with additional helmet rack

Spacey rack for 6 ski equipments. Including basket for small items.

DIMENSIONS	
Width	50 cm
Length	100 cm
Height	155 cm

CAPACITIES	
	6 pairs of ski (or 4 Snowboards) and 6 pairs of shoes
Optional	6 helmets, 6 pairs of gloves and 6 glasses

Butler 2 – Transport rack on swivelling wheels

Transport- and collecting rack with road casters, offers space for the complete ski equipment of 6 people, with integrated pole holders.

DIMENSIONS	
Width	70 cm
Length	120 cm
Height	160 cm

CAPACITIES	
	6 pairs of skis (or 4 snowboards) and 6 pairs of shoes

SERVICE RACK

Workshop trolley

For approx. 30 pairs of skis. Drip tray with drain hose. Including rubber mat. Undercarriage with 4 casters, 2 with brakes.

DIMENSIONS	
Width	120 cm
Height	147 cm
Depth	80 cm

CAPACITIES	
	approx. 30 pairs ski

UNIVERSAL

In this system, a great number of variable ski types and boards can be stored in a minimum space.

UNIVERSAL can be used for alpine, carving, cross country skis and snowboards. This storage system is easy to handle and enables a fast and easy loading and unloading.

THE UNIVERSAL STORAGE SYSTEM

The ideal solution for ski back passes in rental operation and in service workshops.

The inclined lower metal shelf and the upper bars can easily be height adjusted. That means that shorter sport gear such as children skis can also be stored.

Option

- › Boot shelf
- › Easy Hang
- › Flip Clip
- › Undercarriage with swivelling wheels
